

Appeal

Dear Members,

We always say that there should be improvement in system. We always say that these D. C. Rules should be modified or altered as some of them are now redundant or obsolete or out of context.

Currently we are interacting a lot with P.M.C. officials. We are glad to inform you that they are very reciprocative to our ideas.

It was a good experience for all of us to edit circulars along with P.M.C. Officials.

Now there is another chance, which is knocking our doors.

We are up to another challenge i.e. to alter/modify/edit current D.C. Rules.

If we could find the ideals solution; then it would be proposed to P.M.C. for further course of legal action.

We at AESA require expertise from our members to prepare this draft.

Those who are interested to contribute their time and expertise, kindly inform us in writing at your earliest.

Generally it is decided that meetings will be conducted everyday between 8.30 a.m. to 10.00 a.m.

Minimum one and half months is estimated to complete this task.

There are chances that P.M.C. officials will also participate in this activity.

I herewith appeal to members, non-members to come forward and join hands to prepare an ideal draft of D.C. Rules.

(Note : AESA reserves the right to accept or reject the application)
